

NAVEEN PRASATH MANOHARAN

Bangalore, Karnataka | +91 8903123826 | imnaveenprasath@gmail.com

EXECUTIVE SUMMARY

Results-driven Senior Game QA Engineer with 9 years of end-to-end testing experience and a record of reporting **5,000+ high-value bugs**. A proactive problem-solver with a strict "own the product" mindset, bridging the gap between development and design teams. Passionate about authoring game specs, driving tangible revenue growth, mentoring talent, and deploying AI agents to revolutionize QA workflows. Known for balancing deep-dive technical investigations with high release velocity and a razor-sharp eye for edge-case defects across mobile and social gaming platforms.

CORE COMPETENCIES & TOOLSTACK

- **QA Methodologies:** End-to-End Game Lifecycle QA, Agile/Scrum, Shift-Left QA, Monetization & Economy Testing, Edge-Case & Destructive Testing.
- **AI Tools & Agents:** ChatGPT, Gemini, Rovo Agent (Jira), Codex, Atlas.
- **Testing & CI/CD:** ADB, Logcat, Xcode, TestFlight, Jenkins, Perfdog, TestRail, Terminal, VS.
- **Network & API Debugging:** Postman, Charles Proxy.
- **Device Cloud Testing:** BrowserStack, AWS Device Farm.
- **Platforms:** iOS, Android, Google Play Console, Apple Developer, FB/Snapchat/YouTube Games.
- **Analytics & DBs:** Firebase, Sentry, Jira, Confluence, GitHub, Metabase, AppLovin, AWS, Couchbase, SQL.

PROFESSIONAL EXPERIENCE

Moonfrog Labs, Bengaluru, Karnataka

2019 – Present

Senior Game Test Engineer & QA POD Owner

- **Key Portfolio:** Led end-to-end testing for flagship titles including **Ludo Club**, the 3D runner **Captain Escape** (handled single-handedly), and diverse Instant Games (**Ludo**, **Bolt**, **Parchis**, **Carrom**, **AI Face Swap**) across Facebook, Snapchat, and YouTube.
- **Revenue Growth & Stability:** Drove a direct **\$400/week revenue increase** and safeguarded overall monetization by identifying high-value edge-case defects, ensuring zero post-launch emergency interventions.
- **Game Design & Specs Execution:** Authored comprehensive, actively utilized game design specs; successfully designed and executed a character-oriented FTUE (First Time User Experience) currently live in production, with multiple additional feature specs queued for future execution.
- **Sole QA Authority & Delivery:** Operated in a lean pod (3:1 Dev-to-QA ratio), driving 100% on-time delivery across major projects.
- **Solution-Oriented Debugging:** Elevated QA impact from detection to resolution by delivering solution-oriented bug reports, frequently providing actionable logic fixes for broken developer UI/UX flows.

- **Partner Team Approach:** Broke down traditional QA silos by fostering constant cross-functional collaboration across QA, Development, Art, and Design.
- **AI-Driven Efficiency:** Revolutionized manual testing workflows by deploying a modern AI stack:
 - Leveraged **ChatGPT/Gemini** for rapid test plan generation.
 - Utilized **Rovo Agent** for automated Jira reporting and defect triage.
 - Employed **Codex & Atlas** for rapid config validation and SQL querying.
- **Automation Initiatives:** Spearheaded forward-looking initiatives to optimize QA workflows by consulting with an external AI automation studio, evaluating the integration of advanced testing tools into the existing pipeline.
- **Mentorship:** Accelerated the careers of 6 QA professionals, actively guiding 2 into Senior roles and 3 into key IC positions.

Pole To Win (PTW), Bengaluru, Karnataka

2017 – 2019

Game QA Engineer

- **Key Portfolio & Test Cycles:** Executed rigorous end-to-end testing across major client projects including **BDC**, narrative-driven **Choices**, and high-traffic FB Instant Games (**Air Hockey**, **Doodle Jump**, **Space Arena**).
- **Exploit Identification:** Documented severe collision issues and exploits using destructive testing methodologies, protecting in-game economies and multiplayer balance from alpha through gold master phases.
- **Defect Triage & Stakeholder Management:** Championed defect triage meetings with lead developers, successfully advocating for the resolution of high-impact UX issues that directly affected player retention.
- **Performance Profiling:** Captured deep technical metrics (crash logs, memory spikes, frame drops) to pinpoint client-side performance bottlenecks, enabling rapid developer fixes.
- **Compliance & Certification:** Accelerated certification passes by meticulously verifying Apple App Store and Google Play guidelines, resulting in zero platform rejections.

AWARDS & RECOGNITION

Dream Team Award (*Moonfrog Labs*): Recognized for exceptional QA leadership and flawless execution during a critical, high-stakes POD feature release.

Rockstar Award (*Pole To Win*): Honored company-wide for a career record of **5,000+ high-value bugs** that shaped game mechanics and overall stability.

Best Performer Award (*Pole To Win*): Awarded for consistent excellence, rigorous testing standards, and outstanding contributions to game stability.

EDUCATION

B.E. / B.Tech in Computer Science — SVS Educational Institutions, Coimbatore | 2016

INTERESTS

Photography & Digital Art (Cinematic visuals, Sony a6400) | **Filmmaking & Cinema** (Short film Co-director/Actor, Tamil cinema, fan of actor Vijay) | **Literature** (Continuous learner and avid reader)
